

ISCEV@ARVO
May 3, 2014
Hyatt Regency Orlando

2:30 – 3:00 Registration

Session 1

3:00 – 3:15 **Russ Hamer** - Human Cortical Responses to Periodic Vernier Offsets: Effects of Contrast and Gap.

3:15 – 3:30 **John Hetling** - Visualizing differences in corneal potential maps

3:30 – 3:45 **Elise Boulanger, Jad Akesby, Céline Chaumette, José-Alain Sahel, Michel Paques, Isabelle Audo** - Macular spot.

3:45 – 4:00 **Isabelle Audo, K Bujakowska, S Mohand-Said, M Paques, José-Alain Sahel, C Zeitz** - An unusual retinopathy.

4:00 – 4:15 **Tony Robson** - Clinical heterogeneity in a family with mutations in the *USH2A* gene.

4:15 – 4:30 **Mark Pennesi** - Electronegative ERGs in a family with autosomal dominant cone-rod dystrophy.

4:30 – 4:45 **Rad Tzekov** - Spectral distribution changes of 30 Hz flicker signal in retinitis pigmentosa.

4:45 – 5:15 **Refreshment Break**

Session 2

5:15 – 5:30 **Huy Nguyen** – Vision Loss of unknown origin

5:30 – 5:45 **Jin Yang** - Vision Loss of unknown origin

5:45 – 6:00 **Margaret Collins** - Visual Evoked Potentials as an Extension of Electroretinography in Non-Clinical Ocular Toxicity Studies.

5:45 – 6:00 **Jonathan Lyons** - Can you use Multifocal ERG Ring Ratios to detect Hydroxychloroquine retinal Toxicity using skin electrodes?

6:15 – 6:30 **Scott Brodie** - Visual recovery after discontinuation of vigabatrin therapy.

6:30 – 6:45 **Carol Westall, Michelle McFarlane, Tom Wright, Rachel Dragas** - Retinal defect before vigabatrin treatment – Is there association between Etiologies of Infantile Spasms and Retinal Dysfunction?

6:45 – 7:00 **Livia Brandao** - Two-flash mfERG and Ganglion-cell layer: structure-function correlation in Glaucoma.
